

## Ensure system performance and stay compliant to air quality regulations with Insight.

Insight is a digital solution that helps operators stay compliant to emissions regulations, optimize their everyday operations and reduce downtime by giving 24/7 remote access to data from Gasmeter's continuous emission monitoring systems CEMS II e / CEMS II ef. The platform utilizes data encryption and enables remote data access online through a secure protocol.

## Key highlights

- > Secure and remote access to centralized data 24/7
- > Accessible view for ESG and sustainability reporting
- > Smart alarm information - Act quickly when needed
- > Diagnostic data readily available - Service is always close to you
- > Predictive reliability-centered maintenance

**Insight digital solution supports your operations.  
Anytime and anywhere.**
